

Option 3:

Cone Mount – Straight Pedestal (SLNR Option Only)

This arrangement is for the SLNR agitator model only. The arrangement involves welding of a specifically designed cone to the outside of the wine tank. This cone is designed to allow easy installation of the agitator and also provide additional support to the tank at the point where the agitator is mounted. The cone is designed to suit the specific size of the wine tank and ensure proper alignment of the agitator.

The location of the agitator in the tank should be as per the following drawings.
